THANK YOU FOR YOUR SUPPORT

Stormwater Review

What is stormwater pollution?

Whether you call it stormwater pollution, polluted runoff, people pollution, watershed pollution or nonpoint source pollution, it all boils down to the same problem:

As stormwater travels across lawns, parking lots, gardens, roofs, and roadways, it picks up trash (such as candy wrappers, cigarette butts and cups) and other less visible pollutants (such as gasoline, motor oil, anti-freeze, fertilizers, pesticides and pet waste). This polluted runoff flows directly into storm drains, rivers, lakes, streams and the ocean. Once polluted runoff reaches the water, it can contaminate drinking water supplies, kill fish and other wildlife.

Human activity is largely responsible for the stormwater pollution. Everything that we put on the ground or into the storm drain can end up in our water. Each of us has a responsibility to make sure these contaminants stay out of our water. Whether we have clean water is up to you.

But there is good news - you have the power to stop your contribution to stormwater pollution and keep your environment clean. Simple changes can make a tremendous difference. Here are just a few ways you can help:

Place litter in trash cans.

Place litter, including cigarette butts and fast food containers, in trash receptacles. Never throw litter in streets or down storm drains.

LAC NEWSLETTER JULY 2016

PO Box 157
Hancocks Bridge, NJ 08038

Recycle as much as possible.

Use less fertilizer. Do a soil test to see if fertilizers are necessary. Fertilizers contain nutrients that, in abundance, cause blooms of algae that can lead to fish kills. Avoid the overuse of fertilizers and do not apply them before a heavy rainfall. Use alternatives to pesticides whenever possible. If you do use a pesticide, follow the label directions carefully. Many household products made to exterminate pests are also toxic to humans, animals, aquatic organisms and plants.

Dispose of household hazardous waste properly. Do not pour household hazardous products down any drain or toilet. Do not discard with the regular household trash.

Use natural and less toxic alternatives whenever possible. Contact your County Solid Waste Management Office for information regarding household hazardous waste collection in your area. Many common household products (paint thinners, mothballs, drain and oven cleaners, to name a few) contain toxic ingredients.

Recycle all used motor oil.

Do not dump used motor oil down storm drains or on the ground. Take used motor oil to a local public or private recycling center. Used motor oil contains toxic chemicals that are harmful to animals, humans and fish.

Current Resident or
The Emil & Christine Traum Family
622 New Bridge Road --Leisure Arms Unit E-29
SALEM, NEW JERSEY 08079-

LAC AMBULANCE SQUAD is looking for anyone 18 years of age or older who would like to make a difference in their community and join with them to provide Emergency Services to our residents.
